

Ape Unit

Ape Unit is a tech hub — a multidisciplinary and inclusive network of creators, strategists, developers and designers based in Berlin. Our work is filled with curiosity. We like to identify opportunities, to excite and to embrace that feeling of wonder which sparks action.

Our unit-based approach originates from the desire to discover opportunities together. Each specialized unit is a team of highly ambitious creators with a clear set of goals.

Philipp Klein — Development

Ray Jacobs — Design

Tim Herzog — Management

Thomas Zimmermann — Coaching

Sadi Qevani — Development

Shubham Chaudhary — Development

Shubendu Shekar — Development

Yashar Mansoori — Research

Unit ⑧

Blockchain Powerhouse

Unit ⑧ focuses on creating tools, decentralized applications, and the infrastructure around blockchain technology. Next to that, we have an advising role in new projects and initiatives in the rapidly evolving blockchain space.

We are intrinsically motivated to help this technology reach its full potential by making it more accessible and useful for everyone. You may call us believers. We are based in Berlin with established teams in Bulgaria, India and Russia.

Unit ④

Digital Task Force

Unit ④ creates digital solutions and transforms exciting ideas into powerful services. We are specialised in Corporate Websites, Digital Branding and Digital Product Building. We are experienced and hands-on, generate fast results and improve processes through our design-oriented development.

Our way of working is based on agile methods and the optimal interaction of strategy, design and development: all parties involved sit at one table.

If you have been a part of our journey so far, we want to thank you.

If we haven't met yet, we'd love to hear from you.
